SPECIAL ABILITIES

Black Hole (Su) When fully attuned to graviton mode,
as a standard action Altronus can pull any number
of creatures he targets that are within 20 feet of
him toward him. Each target must succeed at a DC 11
Fortitude save or move 5 feet closer. This movement
does not provoke attacks of opportunity. After using this
power, Altronus becomes unattuned.

Desert Stride Altronus can move through nonmagical
difficult terrain in deserts, hills, and mountains at his
normal rate.

Four-Armed Altronus has four arms, all of which can wield
and carry items normally, though this does not affect
how many attacks he can make each round.

Solar Manifestation (Solar Weapon) Altronus has a mote
of yellow light that orbits him. He can grab this and turn
it into a solar weapon with the same ease as drawing

a weapon. It is considered a one-handed advanced melee
weapon that deals 1d6 slashing damage.

Stellar Mode At the beginning of Altronus's first round
in a combat, he must choose one of three modes—
graviton-attuned, photon-attuned, or unattuned. If
graviton- or photon-attuned, he gains 1 attunement
point for the appropriate mode. Each round, he
either maintains that mode (gaining another
point of attunement, to a maximum of 3), or
becomes unattuned (losing all attunement points,
and he can then enter a new mode on the following
turn). If Altronus has 1 or 2 points in a mode, he is
attuned to that mode. If he has 3 points in a mode, he is
fully attuned to that mode. Some of his abilities function
only when he is attuned or fully attuned to the graviton
or photon mode.

When attuned in graviton mode, Altronus gains a +1
insight bonus to his Reflex saves.

When attuned in photon mode, Altronus gains a +1
insight bonus to damage rolls.

Supernova (Su) When Altronus is fully attuned to photon
mode, as a standard action he can deal 2d6 fire damage
to all creatures within 10 feet of him (Reflex DC 11 half).
After using this power, Altronus becomes unattuned.
